FREE AMERICANS FROM MEDICAL TYRANNY

“I want the freedom to accept or reject any and all medical treatments, including vaccinations, for myself and my minor children.

The state and federal government, employers, merchants, groups, schools, institutions, and other entities should not be able to force me or my minor children to receive any medical intervention, including vaccinations, without my express permission.

I furthermore demand that full disclosure of the risks and benefits of any medical intervention, including screening tests, drugs, devices, surgeries, and vaccines be required by law to be provided to any consumer prior to the delivery of services.”
